CLASSROOM SPOTLIGHT: 2nd-4th Grade Maker Day

In Social Studies the 2nd through 4th grade students have been learning all about economics. They are learning what economics is and how it affect them in their daily lives. They have Learned things about budgets, what currency is, what scarcity means as well as a whole bunch of other things. To complete our unit on economics, the students are working to create a product that they will sell. They will become business owners for a day and sell their product. Students had to figure out what they could make and present their ideas to the license officer (Mrs.

Goen). If they were able to answer all of her questions about their product they were then approved. They have been working all quarter long to get the supplies and materials to make their products. On March 19 the students will become entrepreneur and sell their products to students at our school. Students will buy products (using fake money) and the 2nd-4th graders will figure out if they made a profit and decide what went well in their business and what needed some improvement. The students are really excited and learning a lot.
